# Subject index

Acetone
Polarographic and wavelength-selected fluorescence excitation studies of chlorophyll *a* aggregation in water containing trace amounts of acetone (Agostiano et al.) 301
Acid–base energy
Sequential transduction of light into redox and acid–base energy in photosynthesis (Review) (Losada et al.) 105
Activation energy
Activation energy of photosynthetic oxygen evolution: an attempt at theoretical analysis (Krishtalik) 249
Ammonium ca'ion transport
Kinetic model of quaternary ammonium cation transport through the human red blood cell membrane/electrolyte solution interface in vitro (Krysiński, Figaszewski) 129
Amphiphilic ion
Electrical potential distribution over the bilayer lipid membrane due to amphiphilic ion adsorption (Sokolov et al.) 27
Anion-exchange protein
Dielectric behavior of the anion-exchange protein of human red blood cells. Theoretical analysis and comparison to electrorotation data (Donath et al.) 337
Antibodies
Electropermeabilization of human cultured cells grown in monolayers. Incorporation of monoclonal antibodies (Kwee et al.) 65
Antidepressants
Sensitive and selective voltammetric measurements of tricyclic antidepressants using lipid-coated electrodes (Wang et al.) 217
Antiviral drugs
Transport of the neutral form of amphiphilic drugs through a planar bilayer lipid membrane. The role of the pH gradient (Cherny et al.) 17
Bacteriorhodopsin
Bacteriorhodopsin: current–voltage characteristics (Protnov et al.) 45
Bilayer lipid membranes
Adsorption of gentamicin onto a bilayer lipid membrane (Butko et al.) 153
Electrical potential distribution over the bilayer lipid membrane due to amphiphilic ion adsorption (Sokolov et al.) 27
Electrochemical properties of bilayer lipid membranes modified with metal porphyrins (Krysiński) 93
Transport of the neutral form of amphiphilic drugs through a planar bilayer lipid membrane. The role of the pH gradient (Cherny et al.) 17
Blood
Dielectric behavior of the anion-exchange protein of human red blood cells. Theoretical analysis and comparison to electrorotation data (Donath et al.) 337
Bovine serum albumin
Bovine serum albumin adsorption on a water/nitrobenzene interface (Vaňysek, Sun) 177

Calcium antagonists
Polarography as a technique for determining photodegradation in calcium antagonists (Squella, Nuñez-Vergara) 161
Calcium transport
Possible involvement of mitochondrial calcium transport in causing cell injury in experimental hepatic chronic iron overload (Ceccarelli et al.) 325
Carbon dioxide
On the influence of carbonic anhydrase facilitated $CO_2$ diffusion on the respiration of *Saccharomyces cerevisiae* (Botre' et al.) 361

Carbon anhydrase
On the influence of carbonic anhydrase facilitated $CO_2$ diffusion on the respiration of *Saccaromyces cerevisiae* (Botre' et al.) 361
Carbon paste electrodes
Electrochemical behaviour of drugs at lipid modified carbon paste electrodes (Kaufmann et al.) 167
d(CCAGGCCTGG)
Electrochemical analysis of the self-complementary B-DNA decamer d(CCAGG-CCTGG) (Paleček et al.) 285
Chlorophyll
Polarographic and wavelength-selected fluorescence excitation studies of chlorophyll *a* aggregation in water containing trace amounts of acetone (Agostiano et al.) 301
Spectroscopic and electrochemical characterization of chlorophyll *a* in different water+organic solvent mixtures (Agostiano et al.) 311
Coenzymes
Voltammetric and spectroscopic studies of pyrroloquinoline quinone coenzyme under neutral and basic conditions (Kano et al.) 227
Coupled electrogenic transport
A new concept of electrochemical membrane equilibrium. Coupled tranport and membrane potential (Markin, Sokolov) 1
Creatinine
New enzyme sensors for urea and creatinine analysis (Campanella et al.) 195
Current–voltage characteristics
Bacteriorhodopsin: current–voltage characteristics (Portnov et al.) 45
Cytochrome *c* oxidase
Reconstitution of cytochrome *c* oxidase into phospholipid vesicles: effect of detergents (Vallone et al.) 265

Detergents
Reconstitution of cytochrome *c* oxidase into phospholipid vesicles: effect of detergents (Vallone et al.) 265
Deuterium isotope effect
Overall kinetics of photosystem II. pH dependence and deuterium isotope effect (Krohs, Metzner) 141
Dielectric behaviour
Dielectric behavior of the anion-exchange protein of human red blood cells. Theoretical analysis and comparison to electrorotation data (Donath et al.) 337
DNA
Electrochemical analysis of the self-complementary B-DNA decamer d(CCAGG-CCTGG) (Paleček et al.) 285
Double layer
Electrical potential distribution over the bilayer lipid membrane due to amphiphilic ion adsorption (Sokolov et al.) 27
Drugs
Electrochemical behaviour of drugs at lipid modified carbon paste electrodes (Kaufmann et al.) 167

Electron transfer mediators
Electrochemical approach to the development of a photoelectrode on the basis of photosynthetic reaction centers (Katz et al.) 239
Electron transport
Electron transport in biological processes. Electrochemical behaviour of ubiquinone Q,10 adsorbed on a pyrolytic graphite electrode (Schrebler et al.) 81
Electrorotation
Dielectric behavior of the anion-exchange protein of human red blood cells. Theoretical analysis and comparison to electrorotation data (Donath et al.) 337
Enzyme sensors
New enzyme sensors for urea and creatinine analysis (Campanella et al.) 195

Flavinmononucleotide
The effect of flavinmononucleotide on the sensitivity of glucose oxidase electrodes with the complex tetrathia fulvalene–tetracyanoquinodimethane (O'Hare et al.) 203
Fluorescence excitation
Polarographic and wavelength-selected fluorescence excitation studies of chlorophyll *a* aggregation in water containing trace amounts of acetone (Agostiano et al.) 301

Gentamicin
Adsorption of gentamicin onto a bilayer lipid membrane (Butko et al.) 153
Glucose oxidase
the effect of flavinmononucleotide on the sensitivity of glucose oxidase electrodes with the complex tetrathia fulvalene–tetracyanoquinodimethane (O'Hare et al.) 203

Graphite electrode
Electron transport in biological processes. Electrochemical behaviour of ubiquinone Q,10 adsorbed on a pyrolytic graphite electrode (Schrebler et al.) 81

Hepatic chronic iron overload
Possible involvement of mitochondrial calcium transport in causing cell injury in experimental hepatic chronic iron overload (Ceccarelli et al.) 325

Human cultured cells
Electropermeabilization of human cultured cells grown in monolayers. Incorporation of monoclonal antibodies (Kwee et al.) 65

Human red blood cells
Dielectric behavior of the anion-exchange protein of human red blood cells. Theoretical analysis and comparison to electrorotation data (Donath et al.) 337
Kinetic model of quaternary ammonium cation transport through the human red blood cell membrane/electrolyte solution interface in vitro (Krysiński, Figaszewski) 129

Instirred layers
Transport of the neutral form of amphiphilic drugs through a planar bilayer lipid membrane. The role of the pH gradient (Cherny et al.) 17

Interface potential distribution
Electrical potential distribution over the bilayer lipid membrane due to amphiphilic ion adsorption (Sokolov et al.) 27

Iron
Possible involvement of mitochondrial calcium transport in causing cell injury in experimental hepatic chronic iron overload (Ceccarelli et al.) 325

Light
Sequential transduction of light into redox and acid–base energy in photosynthesis (Review) (Losada et al.) 105

Lipid-coated electrodes
Sensitive and selective voltammetric measurements of tricyclic antidepressants using lipid-coated electrodes (Wang et al.) 217

Lipids
Electrochemical behaviour of drugs at lipid modified carbon paste electrodes (Kaufmann et al.) 167

Membrane potential
A new concept of electrochemical membrane equilibrium. Coupled transport and membrane potential (Markin, Sokolov) 1

Membranes
Adsorption of gentamicin onto a bilayer lipid membrane (Butko et al.) 153
Change in the structure and permeability of phosphatidylcholine membranes stimulated by prostaglaindins (Sorokina et al.) 271
Electrical potential distribution over the bilayer lipid membrane due to amphiphilic ion adsorption (Sokolov et al.) 27
Electrochemical properties of bilayer lipid membranes modified with metal porphyrins (Krysiński) 93
Kinetic model of quaternary ammonium cation transport through the human red blood cell membrane/electrolyte solution interface in vitro (Krysiński, Figaszewski) 129

Membrane transport
Transport of the neutral form of amphiphilic drugs through a planar bilayer lipid membrane. The role of the pH gradient (Cherny et al.) 17

Metal porphyrins
Electrochemical properties of bilayer lipid membranes modified with metal porphyrins (Krysiński) 93

Mitochondrial calcium transport
Possible involvement of mitochondrial calcium transport in causing cell injury in experimental hepatic chronic iron overload (Ceccarelli et al.) 325

Monoclonal antibodies
Electropermeabilization of human cultured cells grown in monolayers. Incorporation of monoclonal antibodies (Kwee et al.) 65

Nigericin
A new concept of electrochemical membrane equilibrium. Coupled transport and membrane potential (Markin, Sokolov) 1

Nitrobenzene
Bovine serum albumin adsorption on a water/nitrobenzene interface (Vaňysek, Sun) 177

Organic solvents
Spectroscopic and electrochemical characterization of chlorophyll *a* in different water + organic solvent mixtures (Agostiano et al.) 311

Oxygen evolution
Activation energy of photosynthetic oxygen evolution: an attempt at theoretical analysis (Krishtalik) 249

Permeabilization
Electropermeabilization of human cultured cells grown in monolayers. Incorporation of monoclonal antibodies (Kwee et al.) 65
pH dependence
Overall kinetics of photosystem II. pH dependence and deuterium isotope effect (Krohs, Metzner) 141
pH gradient
Transport of the neutral form of amphiphilic drugs through a planar bilayer lipid membrane. The role of the pH gradient (Cherny et al.) 17
Phosphatidylcholine
Change in the structure and permeability of phosphatidylcholine membranes stimulated by prostaglandins (Sorokina et al.) 271
Phospholipid vesicles
Reconstitution of cytochrome *c* oxidase into phospholipid vesicles: effect of detergents (Vallone et al.) 265
Photodegradation
Polarography as a technique for determining photodegradation in calcium antagonists (Squella, Nuñez-Vergara) 161
Photoelectrochemical cell
Electrochemical approach to the development of a photoelectrode on the basis of photosynthetic reaction centers (Katz et al.) 239
Photosynthesis
Sequential transduction of light into redox and acid–base energy in photosynthesis (Review) (Losada et al.) 105
Photosynthetic oxygen evolution
Activation energy of photosynthetic oxygen evolution: an attempt at theoretical analysis (Krishtalik) 249
Photosystem II
Overall kinetics of photosystem II. pH dependence and deuterium isotope effect (Krohs, Metzner) 141
Polarography
Polarography as a technique for determining photodegradation in calcium antagonists (Squella, Nuñez-Vergara) 161
Porphyrins
Electrochemical properties of bilayer lipid membranes modified with metal porphyrins (Krysiński) 93
Prostaglandins
Change in the structure and permeability of phosphatidylcholine membranes stimulated by prostaglandins (Sorokina et al.) 271
Proton pump
Bacteriorhodopsin: current–voltage characteristics (Portnov et al.) 45
Purple membranes
Bacteriorhodopsin: current–voltage characteristics (Portnov et al.) 45
Pyrolytic graphite electrode
Electron transport in biological processes. Electrochemical behaviour of ubiquinone Q,10 adsorbed on a pyrolytic graphite electrode (Schrebler et al.) 81
Pyrroloquinoline
Voltammetric and spectroscopic studies of pyrroloquinoline quinone coenzyme under neutral and basic conditions (Kano et al.) 227
Quinones
Electrochemical approach to the development of a photoelectrode on the basis of photosynthetic reaction centers (Katz et al.) 239
Voltammetric and spectroscopic studies of pyrroloquinoline quinone coenzyme under neutral and basic conditions (Kano et al.) 227

Reaction centers
Electrochemical approach to the development of a photoelectrode on the basis of photosynthetic reaction centers (Katz et al.) 239
Red blood cell membrane
Kinetic model of quaternary ammonium cation transport through the human red blood cell membrane/electrolyte solution interface in vitro (Krysiński, Figaszewski) 129
Redox energy
Sequential transduction of light into redox and acid–base energy in photosynthesis (Review) (Losada et al.) 105
Remantadin
Transport of the neutral form of amphiphilic drugs through a planar bilayer lipid membrane. The role of the pH gradient (Cherny et al.) 17

*Saccharomyces cerevisiae*
On the influence of carbonic anhydrase

facilitated $CO_2$ diffusion on the respiration of *Saccharomyces cerevisiae* (Botre' et al.) 361
Sequential transduction
Sequential transduction of light into redox and acid–base energy in photosynthesis (Review) (Losada et al.) 105
Sodium dodecylsulphate
Electrical potential distribution over the bilayer lipid membrane due to amphiphilic ion adsorption (Sokolov et al.) 27

Tetrathiafulvalene–tetracyanoquinodimethane
The effect of flavinmononucleotide on the sensitivity of glucose oxidase electrodes with the complex tetrathia fulvalene–tetracyanoquinodimethane (O'Hare et al.) 203
Thermodynamic equilibrium
A new concept of electrochemical membrane equilibrium. Coupled transport and membrane potential (Markin, Sokolov) 1
Tricyclic antidepressants
Sensitive and selective voltammetric measurements of tricyclic antidepressants using lipid-coated electrodes (Wang et al.) 217

Ubiquinone Q,10
Electron transport in biological processes. Electrochemical behaviour of ubiquinone Q,10 adsorbed on a pyrolytic graphite electrode (Schrebler et al.) 81
Urea
New enzyme sensors for urea and creatinine analysis (Campanella et al.) 195

Water
Bovine serum albumin adsorption on a water/nitrobenzene interface (Vaňýsek, Sun) 177
Polarographic and wavelength-selected fluorescence excitation studies of chlorophyll *a* aggregation in water containing trace amounts of acetone (Agostiano et al.) 301
Spectroscopic and electrochemical characterization of chlorophyll *a* in different water+organic solvent mixtures (Agostiano et al.) 311
